

ARTHUR CHEQUER LEITE

Data & AI Analyst | Business Intelligence | Power BI | Python | Reporting Automation | LLM Applications

+55 (31) 99471-0120 | arthurchequer@hotmail.com | [linkedin.com/in/arthurchequer](https://www.linkedin.com/in/arthurchequer) | [arthurchequer.com](https://www.arthurchequer.com)

PROFESSIONAL SUMMARY

Data and AI Analytics professional with experience transforming complex operational datasets into dashboards, recurring reports, monitored indicators, and reporting automations. Skilled in Power BI, data analysis, data cleaning, KPI/KRI/KCI monitoring, Python, data visualization, and executive reporting. Current analytics work is applied to cybersecurity, risk, governance, and compliance data in a global environment, including 60+ monitored indicators, 4 Power BI dashboards, and 2 reporting automations. MBA candidate in Artificial Intelligence, Data Science, and Big Data, focused on LLM applications, RAG, NLP, prompt engineering, and AI-powered automation.

ANALYTICS VALUE PROPOSITION

- **Data-to-insight translation:** convert operational, risk, compliance, phishing, vulnerability, endpoint, and control data into dashboards, reports, indicators, and management views.
- **BI and reporting delivery:** build Power BI dashboards and analytical views for performance tracking, trend analysis, executive visibility, and recurring decision-making routines.
- **Automation and AI orientation:** reduce manual reporting effort through automation while developing applied knowledge in Python, LLMs, RAG, NLP, and AI-assisted workflows.

TECHNICAL SKILLS

Data Analytics & BI: Power BI; Data Analysis; Dashboard Development; Data Visualization; KPI/KRI/KCI Monitoring; Data Cleaning; Executive Reporting; Metrics Governance; Trend Analysis; Anomaly Identification; Data Quality; Performance Monitoring.

AI, ML & Automation: Python; Machine Learning Concepts; LLM Applications; Prompt Engineering; RAG; NLP; LangChain; Hugging Face; AI Automation; Reporting Automation.

Applied Data Domains: Operational Metrics; Risk Indicators; Governance and Compliance Data; Security Metrics; Phishing Simulation Data; Awareness Training Data; Vulnerability Data; Endpoint Security Data; Control Monitoring Data.

Platforms & Tools: Power BI; Microsoft Azure; AWS; Google Cloud Platform (GCP); CrowdStrike Falcon; Eramba GRC; SOPHOS Firewall.

PROFESSIONAL EXPERIENCE

RHI Magnesita | Junior Information Security Analyst - Data Analytics, BI & AI Automation Focus | Feb 2025 - Present

- Transform cybersecurity, governance, risk, and compliance datasets into dashboards, recurring reports, metric views, and executive-level insights for global decision-making.
- Build and maintain **4 Power BI dashboards** focused on data visualization, KPI/KRI/KCI tracking, performance monitoring, risk visibility, and management reporting.
- Monitor and validate **60+ indicators** across performance, risk, governance, compliance, and security metrics, supporting data quality and reporting consistency.
- Created **2 reporting automations** to reduce manual work, improve report consistency, and make recurring reporting processes more reliable.
- Clean, structure, and analyze operational datasets to identify trends, anomalies, data gaps, metric issues, and opportunities to improve analytical maturity.
- Use Eramba GRC and CrowdStrike Falcon as data sources and operational platforms for control monitoring, endpoint visibility, compliance tracking, and analytical reporting.

RHI Magnesita | Information Security & GRC Intern - Data Analytics & Reporting | Aug 2023 - Feb 2025

- Supported data analysis, dashboards, recurring reports, metrics tracking, phishing simulation analysis, and awareness analytics in a global environment.
- Built and updated Power BI dashboards to track operational indicators, risk trends, awareness performance, and program effectiveness.
- Analyzed phishing simulation results, user behavior, training performance, and awareness data to identify trends and improvement opportunities.
- Organized Blue Team and Red Team findings, vulnerability records, and technical data to improve reporting quality and management visibility.

LogicNet Tecnologia | Firewall Engineering Intern - Technical Operations & Security Data Exposure | Apr 2023 - Aug 2023

- Supported SOPHOS firewall operations, incident triage, technical tickets, troubleshooting routines, rule configuration, and network security policy maintenance.

EDUCATION

MBA in Artificial Intelligence, Data Science, and Big Data for Business - Ibmecc | May 2025 - May 2026

Bachelor of Technology in Cyber Defense - FIAP | Feb 2023 - Feb 2025

CERTIFICATIONS

Data, AI & Cloud: Microsoft Certified: Azure Fundamentals (AZ-900); Microsoft Certified: AI & ML Engineer; Google Data Analytics Certificate.

Cybersecurity & Technical Foundations: CrowdStrike Falcon Administrator; Cisco Endpoint Security; EC-Council Ethical Hacking Essentials; IBSEC Associate Ethical Hacker; TCM Security Practical Web Application Security and Testing; Security Blue Team Dark Web Operations.

Privacy & Leadership: CertiProf LGPD; Dale Carnegie Communication & Leadership.
