

ARTHUR CHEQUER LEITE

Data & AI Analyst | Business Intelligence | Power BI | Python | Reporting Automation | LLM Applications

+55 (31) 99471-0120 | arthurchequer@hotmail.com | linkedin.com/in/arthurchequer | arthurchequer.com

PROFESSIONAL SUMMARY

Data & AI Analytics professional focused on transforming complex business and operational datasets into dashboards, monitored indicators, recurring reports, automations, and executive insights. Hands-on experience with Power BI, data analysis, data cleaning, data quality, KPI/KRI/KCI monitoring, Python, data visualization, and reporting automation in a global enterprise environment. Current analytics work covers operational, risk, governance, compliance, and security datasets, including 60+ monitored indicators, 4 Power BI dashboards, and 2 reporting automations. MBA candidate in Artificial Intelligence, Data Science, and Big Data, focused on LLM applications, RAG, NLP, prompt engineering, and AI-powered automation.

CORE VALUE PROPOSITION

- Data-to-insight delivery: convert operational, risk, compliance, control, awareness, vulnerability, endpoint, and performance data into dashboards, indicators, reports, and management views.
- BI and metrics governance: build Power BI dashboards and analytical views for KPI/KRI/KCI tracking, trend analysis, data quality, executive visibility, and recurring decision-making routines.
- Automation and AI orientation: reduce manual reporting effort through automation while developing applied expertise in Python, LLMs, RAG, NLP, prompt engineering, and AI-assisted workflows.

TECHNICAL SKILLS

Data Analytics & BI: Power BI; Data Analysis; SQL; Dashboard Development; Data Visualization; Data Cleaning; Data Quality; Trend Analysis; Anomaly Identification; KPI/KRI/KCI Monitoring; Executive Reporting; Metrics Governance; Performance Monitoring.

AI, ML & Automation: Python; Machine Learning Concepts; LLM Applications; Prompt Engineering; Retrieval-Augmented Generation (RAG); Natural Language Processing (NLP); LangChain; Hugging Face; AI Automation; Reporting Automation.

Applied Data Domains: Operational Data; Risk Indicators; Governance Data; Compliance Data; Control Monitoring Data; Awareness Analytics; Vulnerability Data; Endpoint Data; Security Performance Metrics.

Platforms & Tools: Power BI; Microsoft Azure; AWS; Google Cloud Platform (GCP); CrowdStrike Falcon; Eramba GRC; SOPHOS Firewall.

PROFESSIONAL EXPERIENCE

RHI Magnesita | Junior Information Security Analyst - Data & AI Analytics Focus | Feb 2025 - Present

- Transform operational, risk, governance, compliance, and security datasets into Power BI dashboards, recurring reports, metric views, and executive-level insights for global decision-making.
- Build and maintain 4 Power BI dashboards for data visualization, KPI/KRI/KCI tracking, performance monitoring, risk visibility, trend analysis, and management reporting.
- Monitor, validate, and improve 60+ indicators across performance, risk, governance, compliance, and security domains, strengthening data quality and reporting consistency.
- Created 2 reporting automations that reduced manual effort, improved report consistency, and made recurring reporting processes more reliable.
- Clean, structure, and analyze datasets to identify trends, anomalies, data gaps, metric issues, and opportunities to improve analytical maturity.
- Use Eramba GRC and CrowdStrike Falcon as operational data sources for control monitoring, endpoint visibility, compliance tracking, and analytics-driven reporting.

RHI Magnesita | Information Security & GRC Intern - Data Analytics & Reporting | Aug 2023 - Feb 2025

- Supported data analysis, BI dashboards, recurring reporting, metrics tracking, phishing simulation analysis, and awareness analytics in a global enterprise environment.
- Built and updated Power BI dashboards to track operational indicators, risk trends, awareness performance, and program effectiveness.
- Analyzed simulation results, user behavior, training performance, and awareness data to identify trends and improvement opportunities.
- Organized technical findings, vulnerability records, and operational data to improve reporting quality, management visibility, and follow-up routines.

LogicNet Tecnologia | Firewall Engineering Intern - Technical Operations & Data Exposure | Apr 2023 - Aug 2023

- Supported SOPHOS firewall operations, incident triage, technical tickets, troubleshooting routines, rule configuration, and network security policy maintenance, building foundational exposure to technical operations and security data.

EDUCATION

MBA in Artificial Intelligence, Data Science, and Big Data for Business - Ibmecc | May 2025 - May 2026

Bachelor of Technology in Cyber Defense - FIAP | Feb 2023 - Feb 2025

CERTIFICATIONS

Data, AI & Cloud: Microsoft Certified: Azure Fundamentals (AZ-900); Microsoft Certified: AI & ML Engineer; Google Data Analytics Certificate.

Cybersecurity & Technical Foundations: CrowdStrike Falcon Administrator; Cisco Endpoint Security; EC-Council Ethical Hacking Essentials; IBSEC Associate Ethical Hacker; TCM Security Practical Web Application Security and Testing; Security Blue Team Dark Web Operations.

Privacy & Leadership: CertiProf LGPD; Dale Carnegie Communication & Leadership.
